3. The 1950-1955 Six Year Plan was developed by the appropriate ministry concerned with each particular phase of the economy in collaboration with the corresponding department of the PKPG (State Committee for Economic Planning). The individual plans were then completed in the final stage by the PKPG's Department of Coordination supervised by the two PKPG vice presidents for Coordination of Economic Affairs, who hold ministerial rank, and by Hilary Mine, PKPG president and simultaneously Deputy Prime Minister.
4. The production figures for each of the six years of the plan are given only for the more important items. Less significant items are quoted only for 1950 and 1955 (in some cases 1951 and 1952 are also given); the intervening years can be determined by establishing an arithmetic progression between the extremes.
5. Limited quarterly and complete annual production fulfillment reports are issued by the PKPG in percentages based either on the 1949 figures or the 1950-1951 Six Year Plan. When an item is omitted from these bulletins, it generally signifies that the plan was not fulfilled. Percentage figures and other details on specific failures to achieve planned production can frequently be found in newspaper articles charging economic sabotage against groups or specific individuals. Articles authored by prominent Party officials and high government officials in Nowe Działo, the Central Committee organ, Planowanie Gospodarcze, Zycie Gospodarcze and Trybuna Ludu among others, also frequently give valuable indications of the fulfillment of the plan.
